one is alive, and he is so badly injured that he cannot live. This man is William Morgan, an aged Englishman, who was a roadman in the mine. He was blown out of the entrance by the force of the explosion. One hundred and seventy-five miners were checked in for work this morning by the mine boss. In addition to these there were boys who acted as helpers and drivers and roadmen and others, to the number

of perhaps fifty.

The Fraterville mine is the oldest mine in the Coal Creek district, having been opened in 1870. It is fully three miles from the opening of the mine to the point where the men were at work.

They had not been at work long the mine to the point where the men were at work. They had not been at work long before the terrible explosion occurred. There was a fearful roar, and then flames shot from the entrance and the air shafts. As soon as possible two rescuing parties were started in, one at the main entrance, the other through the Thistle mine, which adjoins, and in which no men were at work.

Gas Delayed Rescue.

The Thistle party was unable to make any headway, as the gas stifled the workers. The Fraterville party went fully two miles under the earth until a heavy fall of slate was encountered. At this barrier men worked despende

perately, hoping against hope that those beyond might be safe.

The news of the disaster spread quickly, and the scenes at the mouth of the mine while the workers were within were beyond description.

Business was suspended in Coal Creek and all its mines as soon as the news became known, and men, women and children gathered around the Franch of the same suspended around the same suspended aroun

It seems to be the ambition of all young wives to look well when any one calls. A young bride heard a ring at the front door. The maid was out, and she rushed upstairs to tidy herself before admitting the called. The congregation completely filled the fashionable church of St. Augustine this morning on the occasion of the solemn service organized by the league of French women in memory of the victims of the Martinique disaster. Kingston, St. Vincent, Saturday, May 17.—The continued heat thrown off by the lava prevents any one approaching the volcanic mountain.

From the sea the estates of Wallibu and Richmond present a scene of desolation. They are bereft of vegetation and all the buildings on them have been destroyed. No living being is seen and no sound of any kind is heard.

Small jets of steam issue at intervals from various parts of the plantation as a warning to visitors and the few courageous persons who have approached the locality have found the earth there to be to hot to venture upon. The volcano was apparently quiet Thursday until 5 o'clock in the afternoon. At this hour a distinct discharge of steam occurred and a bulky white cloud issued from the extreme right of the p nuntain, verifying the belief that a new crater had been formed on the Windward side.

It is presumed that La Soufriere will in the future remain active. The surrounding country will then be uninhabitable. The earth in that locality is covered with volcanic dust several feet in depth.

The loss as a result of the volcanic eruption includes not only the present crops of the island, but cultivation will be impeded for some years to come.

Serious fears are entertained that another eruption will occur at the foot of the volcano, where steam is continually issuing from small fissures. The locality is cracked all over.

The strange color and the depth of the inlet of the sea on the Wallibu estate imply that an eruption occurred there, and that a new crater has been formed which extends from the land into the sea.

The sufferings of the afflicted demand more consideration than the loss of life. The torture of the victims was indescrib-

Vernal, May 18.—The action of congress regarding the opening of the Uintah reservation is being watched with considerable interest here. There are some, however, who are not at all optimistic over the outlook. In the general rejoicing over the prospect of the amendment being allowed to remain on the Indian bill one fact is being lost sight of, and that is that the measure is based upon the proposition that the title to the lands rests with the Indians and that the opening must depend upon the consent of a majority of the male adult members of the tribe. It must be borne in mind that measures have passed congress before which provided that the Indians be treated with regarding the opening, but nothing ever came of them. NEW YORK, May 19.—At the busineess meeting today of the Presbyterian general assembly, Rev. Van Dyke, moderator, preached, Today marked the beginning of the centennial celebration of the Presbyterian home missions, which is being held in connection with the general assembly. Rev. Dr. Samuel A. Martin, president of Wilson college, Chambersburg, Pa., presented the thirty-seventh annual report of the board of missions for freed-

# The Health of a Manly Man

Why will not all men insist upon having it, when it is so easy to get and to ep. Some men are eaten alive by tape-worms, others wander hopelessly for years dying slow deaths from bowel disease. "After taking two Cascarets, there came on the scene a very unexpected visitor in the shape of a tape-worm eighteen feet long at least, which I am sure caused my bad health for three years."

— Geo. W. Bowles, Baird, Miss.

"After taking Cascarets I have had a natural relief without taking medicine of any sort during the past two weeks. This had not occurred for Is years."

—Chas. E. Penny, 601 Tates Are., Brooklyn. "For three years I have been afflicted with Habetes. Since using Cascarets I have found great relief and feel that I must send you my
